Introduction

Welcome to GM-48S-USB GPS Mobile Locator user's manual.

Congratulation on your purchase of the GM-48S-USB® Mobile Locator GPS receiver/antenna. This is the latest in Plug-Navigate-Position innovation from SANJOSE Navigation, manufacturer of OEM GPS receiver & antenna around the world.

This new concept of Mobile navigation solution is using the devise to integrate with your Personal Computer and map software to display your real time location on the monitor.

The GM-48S-USB is an all-weather rugged design product for all applications. Before you get started with your GM-48S-USB®, make sure to read the PC hardware requirements to run the Mapping software.

Applications

- ◇ Navigation and positioning
- ◇ Finding streets and routes via GPS map software
- ◇ Travel/track planning
- ◇ Application for Marine Navigation
- ◇ Fleet management GPS system
 - In-car navigating/locating for public safety and emergency AVL GPS function

Package Contents

After opening your package, make sure that the following items are not missing or damaged.

- *GM-48S-USB® Mobile Locator*
- *User's Manual and Driver's CD*

If above items are missing or damaged, contact SAN JOSE Navigation immediately at Tel: 886-2-26879500 Fax: 886-2-26878893

Getting Started

This section will introduce you to simply outfit your new GM-48S-USB® GPS Mobile locator to your PC.

GM-48S-USB® is a compact GPS receiver/antenna design for general purpose navigation and position locating when integrated with a computing device for mapping display (Notebook, PC, and PDA).

Hardware standard layout is shown below:

Hardware Requirement:*Computer 486 or Faster CPU, VGA Display card, Sound board (optional), at least 16MB DRAM, CD-ROM drive, Windows OS, at least a USB port available.*

Power supply: DC 5V from PC's PS-2 or DC 8V ~ 35V from Cigar Charger provided.

Operating Procedure

Caution

DO NOT TRY TO DO STEPS, WHILE VEHICLE IS IN MOTION.
AND KEEP YOUR EYES ON THE ROAD

Step 1: Before installing the USB driver to your computer, please don't plug your GPS USB product to your computer.

Step 2: Place the CD attached in the package into your CD-ROM drive.

Step 3: Browse it and choose GM-44S-232, GM-44S-USB, GM-48S-232, GM-48S-USB\USB driver\Windows 95-98-2000-XP\USB Driver Installer.exe folder if you are using Windows O/S.

Step 4: Click the setup file and press "Next"

Step 5: Choose the Remove option to remove the previous version of the driver if there's any. If there's not, please follow the instructions from step 8.

Step 6: When the removal is done, the system asks you to reboot your computer, please choose "Yes" before you install the newer version of the USB driver.

Step 7: After restart your computer, browse the CD, choose the Windows folder and click the setup file again.

Step 8: Press "Next", and it will thoroughly and automatically install the USB driver to you computer.

Step 9: When it's done, Plug your GPS USB series product into your computer.

Step 10: The screen shows "detect a USB-serial controller device".

Step 11: The system will find its corresponding driver automatically.

Step 12: When it's done, right click "My computer icon" then click "system properties" and find "device manager".

Step 13: Find "Ports (Com & Lpt)", browse it and find "Prolific USB-to-serial Com Port (COM X)" X might be a number depending on your computer's Com Port's situation.

Step 14: Indicate Com port number when you try to use your USB-GPS product as a GPS device.

Notice

1. For more detailed installation instruction, please refer to USB driver installation instruction

Specification

PHYSICAL CONSTRUCTION		PERFORMANCE		
Dimension	56mm (Diameter) x 28 mm (Height)	Built-in Antenna element	High-reliability ceramic patch	
Weight	85 grams ($\pm 5\% \sim 10\%$ or 10 ~ 20 grams) without cable	Sensitivity	-159dbm	
		SBAS	Support WAAS, EGNOS, MSAS	
Receiving frequency	1575.42MHZ, C/A code	Receiver architecture	20 parallel channels	
Enclosure	High impact, corrosion-proof	Start-up time	0.1 sec. typical (hot start) 35 sec. typical (warm start) 42 sec. typical (cold start)	
Mounting	Magnetic mounting	Position accuracy	Without aid	10.0 m, 2D RMS
			DGPS (WAAS, EGNOS, RTCM)	5.0 m, 2D RMS
Construction	Ultrasonic welded, fully waterproof	Max. Velocity & Altitude	518 m/s; 18000m	
ENVIRONMENTAL CONDITIONS		Update Rate	1 Hz	
Temperature	Operating: -30 ~ +75 °C	Power Supply	DC 5V	
	Storage: -40 ~ +85 °C		DC 8V ~ 35V from cigar charger provided	
COMMUNICATION		Power Consumption	Acquisition	100mA
			Tracking	80mA
Protocol	NMEA, UBX binary, RTCM	Baud Rate	4800 bps	
Signal level	USB			
INTERFACE CAPABILITY		POWER CABLE		
Standard Output Sentences	GGA, RMC, GSV, GSA	Length	5m	

APPENDIX

Troubleshooting Tips.

1. No updated display in your PC while moving.

- *Check cable connections and COM port setting AT Control Panel/System Properties/Device Manager/Com-Port.*
- *Check raw data by using Window Terminal 4800bps*

2. No ASCII NMEA data when running terminal program in COM-n,4800 8N1

- *Check Control Panel/System Properties/Device Manager/Com-Port.*

3. Navigational software does not auto detect the GPS receiver

- *Check Installation & If the USB connecter connects to PC*

4. If your PC recognizes GM-48S-USB as a mouse

- *Please remove the GM-48S-USB from the USB Port of your PC or device and plug it back. If it still happens, please reinstall the USB drive.*

5. No GPS data after program initialize.

- *Check USB connection.*
- *Check for GPS obstruction toward the sky.*

6. GPS data are visible but no activity on the MAP SOFTWARE.

- *Check to see if the Map software desire NMEA sentences (GPRMC, GPGGA, GPGSV, GPGSA) are present in viewing using Terminal Windows set at 4800bps.*
